SUMMARY REPORT  
FT 950-E

NOVEMBER 1959

FOR RELEASE  
January 7, 1960

## EXPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the slight increase in exports of domestic and foreign merchandise, including Special Category commodities, from \$1,476.2 million<sup>1</sup> in October to \$1,478.6 million in November resulted primarily from a substantial increase in exports to Western Europe, which was largely offset by declines in exports to Canada and other areas. Changes in the dollar value of exports to all areas from October to November were as follows: Western Europe, from \$465.9 to \$505.9 million; Canada, from \$332.5 to \$295.2 million; Latin American Republics, from \$298.3 to \$290.0 million; dependencies of Western Europe, from \$55.1 to \$51.5 million; and "all other countries," from \$304.5 to \$324.4 million. November exports of Special Category commodities, were valued at \$137.3 million as compared to the October total of \$139.4 million.

The November export total excluding Special Category commodities amounted to \$1,341.3 million, a level slightly higher than the \$1,336.8 million reported in October. Increases were reported in exports to all continents except North America.

<sup>1</sup> Available records indicate that there was an increase in September in the number of vessels loaded during that month but not departing until the first of the following month or later. This indicates that accelerated vessel loading took place at the end of September in anticipation of the longshoremen's strike. Some of this accelerated loading probably is reflected in the September totals, but merchandise loaded in September on vessels departing October first or later are included in the October totals in accordance with regular compiling procedures.

Exports to Europe rose from \$400.9 million in October to \$427.1 million in November owing chiefly to increases in exports to individual countries of this continent as follows: Belgium and Luxembourg, from \$28.7 to \$37.5 million; Netherlands, from \$55.4 to \$63.3 million; Spain, from \$4.6 to \$10.7 million; France, from \$27.2 to \$30.7 million; and Switzerland, from \$14.3 to \$17.8 million. During the period, however, exports to Turkey and the United Kingdom decreased, from \$14.4 to \$6.1 million and from \$89.3 to \$84.1 million, respectively. Exports to Asia increased from \$216.4 to \$227.5 million as increases were reported in exports to Japan from \$73.5 to \$90.3 million and Iran (Persia), from \$8.6 to \$13.7 million. However, exports to Kuwait dropped from \$9.2 to \$3.2 million. Increases in exports to New Zealand, from \$3.9 to \$8.2 million and Australia from \$30.0 to \$32.2 million accounted for most of the gain in exports to Australia and Oceania, from \$34.9 to \$41.1 million. Exports to Africa increased slightly from \$49.1 to \$53.8 million. A small increase was registered in total exports to South America, \$152.9 to \$154.9 million, as counterbalancing changes were reported in exports to some of the individual countries of this continent. The more noticeable of these were Venezuela, from \$66.1 to \$58.0 million; Brazil, from \$25.5 to \$30.4 million; and Argentina, from \$16.4 to \$21.2 million.

Meanwhile, exports to North America, reflecting noticeable decreases in exports to Canada, from \$324.5 to \$286.8 million and Mexico, from \$66.6 to \$60.4 million, fell from \$482.6 million in October to \$437.0 million in November.

## EXPLANATION OF STATISTICS

**COVERAGE:** Export Statistics include government as well as non-government shipments to foreign countries. The export statistics, therefore, include Mutual Security Program military aid, Mutual Security Program economic aid, and Department of the Army Civilian Supply shipments. Separate figures for Mutual Security Program military aid are shown in the footnotes of this report. Shipments to United States armed forces and diplomatic missions abroad for their own use are excluded from export statistics. United States trade with Puerto Rico, Hawaii, and United States Possessions is not included in this report, but the export trade of Puerto Rico and Hawaii with foreign countries is included as part of the United States export trade. Merchandise shipped in transit through the United States between foreign countries is not included in exports.

**COUNTRY DEFINITION:** Although the country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, or further processed or manufactured, the statistics do not always reflect this definition, as the shipper may not know the ultimate destination of the shipment. In such cases, the shipments are credited to the last country, as known to the exporter at the time of shipment from the United States, to which the goods are to be shipped in their present form. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment or merchanting countries and undercounted for other countries. As explained in the footnotes to the table, exports of Special Category commodities are not included in any of the published country totals, for reasons of security.

**VALUATION:** The valuation definition used in the export statistics is the value at the seaport, border point, or air-port of exportation. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the United States port of exportation are excluded. However, in some instances the valuation may not be reported in accordance with this definition, particularly where the export value is difficult to determine or must be estimated. None of the values have been adjusted for changes in price level.

**EFFECT OF SAMPLING:** The value of export shipments individually valued from \$100 to \$499 (about five percent of total export value) is estimated by sampling. The estimated values are distributed among the area, continent and country totals shown in the table. The probable variability in the export figures due to sampling is less than two percent of the individual totals shown, or less than \$50,000. The largest variation from rounding of figures is \$50,000. For further information regarding the sampling procedures, see the September 1953, February 1954, and January and June 1956 issues of Foreign Trade Statistics Notes.

Further information regarding coverage, country definition, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 410. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.
